

AKASH SINGH

Data Scientist & AI/ML Engineer | NLP & Python Developer | Fresher — B.Sc. CS 2025

8454078840 | rajputakash1656@gmail.com | Airoli, Navi Mumbai 400708 github.com/Rajputakash10-ux | linkedin.com/in/akash-rajput-9433aa368

PROFESSIONAL SUMMARY

Motivated B.Sc. Computer Science graduate (2026) with hands-on experience building and deploying AI/ML models, NLP pipelines, and data-driven applications. Proficient in Python, TensorFlow, and Scikit-Learn with 3 end-to-end ML projects on GitHub — including a deployed NLP chatbot and an ML-powered stock prediction platform. Combines technical depth with strong client-communication skills from 2+ years in professional roles. Seeking a full-time Data Science or AI/ML role where I can build real-world intelligent systems from day one.

TECHNICAL SKILLS

Languages: Python (Advanced), SQL (Proficient)

AI / ML: Machine Learning, Deep Learning, NLP, Scikit-Learn, TensorFlow, Keras

Data Science: Pandas, NumPy, EDA, Feature Engineering, Predictive Modeling, Data Cleaning, Hyperparameter Tuning

Visualization: Matplotlib, Seaborn, Power BI.

Backend & Tools: Flask, DJANGO, REST APIs, Git, GitHub, Jupyter Notebook, VS Code

Currently Learning: CNNs, RNNs/LSTMs, Transfer Learning (BERT), MLOps basics, PyTorch

PROJECTS

NLP Chatbot | github.com/Rajputakash10-ux/newly-chatbot/deployments

Python · TensorFlow · Keras · NLP · REST API

Built and deployed an end-to-end NLP chatbot using TensorFlow/Keras for automated query handling with multi-class intent recognition.

Designed full NLP pipeline: raw text → cleaning → tokenization → word embeddings → deep learning classifier.

Deployed with a REST API interface for real-time query handling; fine-tuned iteratively to improve accuracy on edge-case inputs.

ML Pipeline & Predictive Models | github.com/Rajputakash10-ux

Python · Scikit-Learn · Pandas · NumPy · GridSearchCV

Built modular end-to-end ML pipelines covering data ingestion, cleaning, transformation, training, and evaluation.

Applied and benchmarked Linear Regression, Decision Trees, Random Forest, and SVM algorithms on real-world datasets.

Improved prediction accuracy via systematic feature engineering (encoding, scaling, selection) and GridSearchCV hyperparameter tuning; validated using ROC-AUC, RMSE, and R^2 metrics.

Stock Talks — AI Trading Platform | github.com/Rajputakash10-ux/StockTalks

Python · ML · Technical Analysis (RSI, MACD, MA) · Risk Analytics

Built an AI-powered quantitative trading platform combining ML models, technical indicators (RSI, MACD, moving averages), and a risk analytics module.

Integrated predictive models for stock price movement on historical data; modular architecture supports adding new ML models or data sources.

EDUCATION

Bachelor of Science (B.Sc.) — Computer Science | Grade: A (CGPA 8.50)

JVM Mehta Degree College, Airoli, Navi Mumbai · Jul 2023 – May 2026

Activities: Coding Club · Placement Cell Volunteer · College Tech Fest Volunteer

STRENGTHS & LANGUAGES

Strengths: Consistent self-learner (daily ML practice) · Analytical problem-solving · Works well under pressure · Strong communicator

Languages: English, Marathi, Hindi
