

Akash Singh

Aspiring Data Scientist | AI/ML & NLP Enthusiast | Python Developer

☎ 8454078840 | ✉ rajputakash1656@gmail.com | 📍 Airoli, Navi Mumbai 400708 | github.com/Rajputakash10-ux | linkedin.com/in/akash-rajput-9433aa368

Professional Summary

Motivated fresh graduate with a B.Sc. in Computer Science and hands-on experience building AI/ML models, NLP pipelines, and data-driven applications. Combines technical depth in Python, TensorFlow, and Scikit-Learn with strong communication and client-handling skills developed across customer service and recruitment roles. Actively seeking a full-time Data Science or AI/ML role where I can contribute to real-world intelligent systems.

Technical Skills

Languages: Python, SQL

AI / ML: Machine Learning, Deep Learning, NLP, Scikit-Learn, TensorFlow

Data Science: Pandas, NumPy, EDA, Feature Engineering, Predictive Modeling, Data Cleaning

Visualization: Matplotlib, Seaborn, Power BI

Backend & Tools: Flask, Streamlit, REST APIs, Git, GitHub, Jupyter Notebook, VS Code

Web Basics: HTML, CSS, JavaScript, React Basics

Projects

NLP Chatbot | github.com/Rajputakash10-ux/newly-chatbot/deployments

- Built an end-to-end NLP-based chatbot using Python and TensorFlow for automated query handling.
- Implemented text preprocessing, tokenization, and intent recognition pipeline.
- Improved response accuracy through fine-tuning deep learning models on domain-specific data.

ML Pipeline & Predictive Models | [URL](#)

- Developed complete machine learning pipelines covering data preprocessing, model training, and evaluation.
- Applied regression and classification algorithms using Scikit-Learn on real-world datasets.
- Improved prediction accuracy through feature engineering and hyperparameter tuning.

Stock Talks | github.com/Rajputakash10-ux/StockTalks

- Built an AI-based quantitative trading and stock prediction platform combining ML, Technical Analysis, and Risk Analytics.
- Designed for smarter investment decisions using predictive modeling and market data analysis.

Work Experience

Email Process Associate

Sutherland Global Services · Mumbai Oct 2025 – Feb 2026 (5 mos)

- Handled DU customer service queries via live chat, resolving billing, technical, and account-related issues.
- Managed high chat volumes while consistently meeting quality, accuracy, and SLA response-time targets.
- Resolved escalations efficiently and maintained accurate CRM records for QA and reporting.

HR Recruiter

NLEY Consultants Pvt. Ltd. · Mumbai Apr 2025 – Sep 2025 (6 mos)

Full-time

- Sourced and screened candidates for BPO and tech roles across multiple client mandates.
- Managed end-to-end hiring cycles including job postings, interview coordination, and offer rollout.
- Wrote targeted job descriptions and maintained high client satisfaction through proactive follow-ups.

Customer Relationship Executive

1Point1 · Mumbai Dec 2023 – Oct 2024 (11 mos)

Part-time | 🏆 Champion Award — Recognized for high-quality customer service and performance excellence

- Handled customer queries and complaints via calls, chat, and email channels.
- Managed high call volumes while consistently meeting SLA and service quality benchmarks.
- Resolved escalations with empathy; maintained accurate interaction records for reporting.

Insurance Agent

LIC · Mumbai Feb 2024 – Jul 2024 (6 mos)

Freelance

- Assisted in policy generation, renewal follow-ups, and end-to-end client communication.
- Managed documentation and field coordination for multiple policyholders.

Hospitality Associate

Hotel Silver · Daman 2018 – 2020

- Managed customer service and guest relations in a professional hospitality environment.
- Assisted guests with requests, coordination, and issue resolution.

Education

Bachelor of Science (B.Sc.) — Computer Science Jul 2022 – May 2025

JVM Mehta Degree College, Airoli, Navi Mumbai 400708 · Grade: A (6 Semesters)

Activities: Coding Club · Placement Cell Volunteer · College Tech Fest Volunteer

Strengths

- Consistent — continuous self-learning in AI/ML and Data Science
- Problem-solving and analytical thinking
- Ability to work under pressure and meet deadlines

- Strong communication and teamwork skills

Languages

English — Advanced Marathi — Intermediate

Interests

AI & Machine Learning Research · Backend Development · Data Analytics & Visualization · Building Real-World Projects · Football and Fitness · Continuous Skill Development

Project Deep Dives

01 NLP Chatbot

Python · TensorFlow · NLP · Deep Learning · Keras

github.com/Rajputakash10-ux/newly-chatbot/deployments

Problem Statement

Businesses receive repetitive customer queries at high volume. Manual handling is slow and inconsistent. This chatbot automates query resolution using intent recognition and natural language understanding.

Technical Approach

- Designed an NLP pipeline: raw text → cleaning → tokenization → vectorization → classification
- Built and trained a deep learning model using TensorFlow/Keras for multi-class intent recognition
- Used word embeddings to improve semantic understanding of user inputs
- Deployed the chatbot with a REST API interface for real-time query handling

Key Outcomes

- Achieved reliable intent classification across multiple query categories
- Reduced response time significantly compared to manual handling
- Model fine-tuned iteratively to improve accuracy on edge-case inputs

02 ML Pipeline & Predictive Models

Python · Scikit-Learn · Pandas · NumPy · Feature Engineering

Problem Statement

Raw datasets require structured pipelines to go from messy input to reliable predictions. This project demonstrates end-to-end ML workflow from preprocessing to deployment-ready models.

Technical Approach

- Built modular ML pipelines covering data ingestion, cleaning, transformation, and model training
- Applied and compared multiple algorithms: Linear Regression, Decision Trees, Random Forest, SVM
- Performed feature engineering — encoding, scaling, selection — to maximize model performance
- Tuned hyperparameters using GridSearchCV and cross-validation to reduce overfitting

Key Outcomes

- Improved prediction accuracy significantly through systematic feature engineering
- Reusable pipeline structure applicable across different datasets and problem types
- Validated models using confusion matrix, ROC-AUC, RMSE, and R^2 metrics

03 Stock Talks

Python · Machine Learning · Technical Analysis · Risk Analytics · Predictive Modeling

github.com/Rajputakash10-ux/StockTalks

Problem Statement

Stock market prediction requires combining quantitative signals, technical indicators, and risk management. Most retail tools lack AI-driven insights. Stock Talks bridges this gap with an ML-powered platform.

Technical Approach

- Integrated Machine Learning models to predict stock price movements based on historical data
- Incorporated technical indicators (moving averages, RSI, MACD) as model features
- Built a risk analytics module to assess portfolio exposure and flag high-risk positions
- Designed for scalability — modular architecture allows adding new ML models or data sources

Key Outcomes

- Combined quantitative analysis with AI for smarter, data-backed investment decisions
- Platform demonstrates applied ML in a high-impact real-world financial domain

Currently Learning — Deep Learning

Actively upskilling in Deep Learning to build more powerful AI systems. Focus areas:

- Neural Networks — architecture, activation functions, backpropagation, gradient descent
- Convolutional Neural Networks (CNNs) — image recognition and feature extraction
- Recurrent Neural Networks (RNNs) & LSTMs — sequence modeling and time series prediction
- Transfer Learning — fine-tuning pre-trained models (BERT, ResNet) for custom tasks
- Model optimization — regularization, dropout, batch normalization, learning rate scheduling
- Frameworks — TensorFlow, Keras; exploring PyTorch

Skill Proficiency

Self-assessed proficiency levels across core Data Science skills:

Data Visualization  Proficient

Flask / Streamlit  Familiar

Git & GitHub  Proficient

GitHub Profile

Profile: github.com/Rajputakash10-ux

Chatbot Deployment: github.com/Rajputakash10-ux/newly-chatbot/deployments

Stock Talks: github.com/Rajputakash10-ux/StockTalks

Primary Language: Python

Focus Areas: AI/ML, NLP, Data Science, Backend APIs

Always building something new — actively committing code and exploring new ML techniques.

Learning Roadmap — Next 6 Months

Structured plan to grow from junior to mid-level Data Scientist:

- Complete Deep Learning specialization — CNNs, RNNs, Transformers
- Build and deploy a full-stack ML web app using Flask or Streamlit
- Contribute to open-source Data Science or NLP projects on GitHub
- Solve 100+ problems on LeetCode focusing on data structures and algorithms
- Explore MLOps basics — model versioning, monitoring, and deployment pipelines
- Study real-world case studies in recommendation systems and anomaly detection
